

It's Never 2 Late

dignity through technology

Greetings family and friends!

We are so excited to formally announce that we are beginning to roll out our new It's Never 2 Late™ (iN2L™) program! iN2L is an innovative computer system, designed just for your loved ones in our care. This touchscreen computer is programmed for activities, games, therapy, reminiscing, music, virtual travel, and so much more. We can't wait to get started!

One of our favorite features of the iN2L system is that it provides an opportunity for our residents to connect with the world around them, particularly with their family and friends. We look forward to being able to get everyone acquainted with the user-friendly email, and best of all, our new Skype™ program! Skype™ is an easy-to-use live video chat service: you can download it for free and use it on any computer with a webcam and internet connection. With a click of a button, you can visit with family and friends on another continent, across the country, or even just down the hall!

Here's where you come in! There are so many opportunities to impact your loved one through iN2L in a meaningful way. If you're interested in emailing, setting up a video chat, or learning about the great ways you can interact with your loved one from the same room or a great distance, let us know!

With your continued support, we know that this addition to our community is going to be a great success! Feel free to stop by and experience iN2L first hand. We truly believe that *It's Never 2 Late* to have a little bit of fun with technology!
